

IFC Software Certification

Status

Next Steps

NEMETSCHEK
GROUP

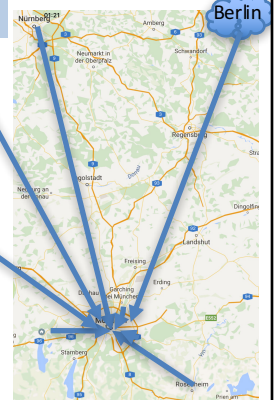

Prof. Rasso Steinmann

- Professor for Building Informatics, Munich University of Applied Sciences
- Director, iabi-Institute of Applied Building Informatics gem. e.V. at Munich University of Applied Sciences
- Cooperation in BIM-Research and BIM-Standardisation
- Chairman, VDI Coordination Circle BIM
-> German National BIM-Standard VDI 2552-Series
- Boardmember, VDI Society Building und Building-Services
- Chairman, buildingSMART German Speaking Chapter
- Board, ExCom, Standards Committees buildingSMART International
- Software Certification, buildingSMART International
- 20 years ISG-Implementer Support Group-Chair (retired 2016)

Wow,
IFC is just perfect
for me
... don't believe it !!!

bS-IFC-SW Certification IFC2x3-Status

- Coordination View 2.0
 - Arch
 - Struct
 - MEP
- 33 Applications certified
- Import & Export
- Import-Only
- Information:
 - www.buildingSMART.org
 - www.buildingSMART-Tech.org

Next step: IFC4 SW-Certification

- Under preparation since 2015
 - Pilot start July 2016
- Information:
 - www.buildingSMART.org
- Start with 2 MVDs
 - IFC4-Reference View
 - Less than IFC2x3 Coord.View 2.0
 - IFC4-Design Transfer View
 - A bit more than IFC2x3 Coord.View 2.0 with specific scope
- More automated testing
- Improved test-cases (lessons learnt)
- Extensive usage of mvdXML
- New supporting cloud-platform
 - Driven by mvdXML
 - Supporting BCF 

Supported by

IFC2x3-Cert will stop, as soon as IFC4-Cert starts

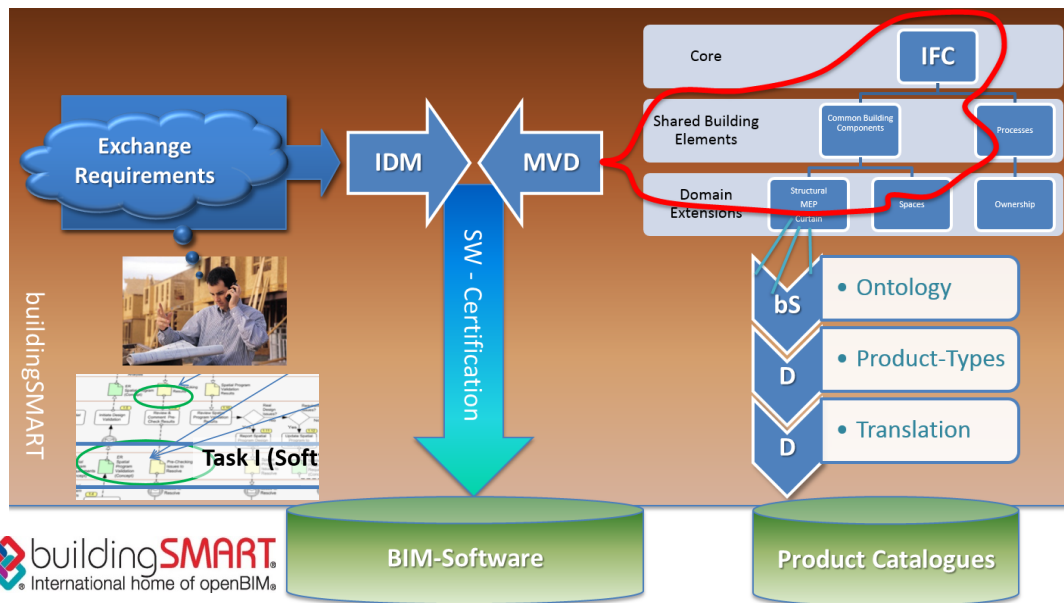

- Why IFC2x3-Cert still today:
 - IFC2x3-Coord.View 2.0 is widely implemented in the market
 - It will take at least 2 years until similar market penetration of IFC4 will be achieved
 - Way to go if an application wants to be compliant with many and especially the leading IFC-supporting applications, today

Certification 2005 > 2010 > 2016

2005 – IFC1.51	2010 – IFC2x3	2016 – IFC4
Ability Check	Quality Check	Improved Quality Check
Coordination View 1.0	>Coordination View 2.0 - 3 Sub-Views - Arch-Struct-MEP - Options and alternatives! - Green, Yellow, Red – Still Certified	> Reference MVD - Arch-/Struct-/MEP-Export - Import for viewing and/or referencing >Design Transfer MVD - Which Exchange Requirements?
Random test cases	Testing instructions - Calibration files for export - Guided import testing	Improved testing instructions - Calibration files for export - Guided import testing - Support via BCF 
MVD-Prosa	MVD-Prosa (XML-Prototype)	mvdXML
	Partial usage of mvdXML	Full usage of mvdXML
	Manual set-up	mvdXML-driven set-up - Also test-case-specific mvdXML
	Implementer agreements in Prosa	Implementer agreements in mvdXML or code as far as possible
		Scalable for multiple MVDs
Manual testing in Workshops -> not scalable	Automated export testing	Improved automated export testing mvdXML-based
Excel-Sheets to manage certification	Web-based management platform Oracle DB -> scalable auditing teams	Cloud-based management platform Latest Cloud-tech -> scalable size and performance -> Scalable auditing teams

The Basis for Software Certification

IFC – IDM – MVD

MVD – Model View Definitions

IFC2x3 MVD

- Prosa specification
 - Human readable only
- Excel-Sheets
- XML-Prototype

Source: www.eltern-wissen.de

IFC4 MVDs

- mvdXML
 - Computer readable
- Can be used by:
 - Automated testing tool
 - Certification platform
 - Software implementers
 - Triggering IFC-SW-Interfaces with wide scope

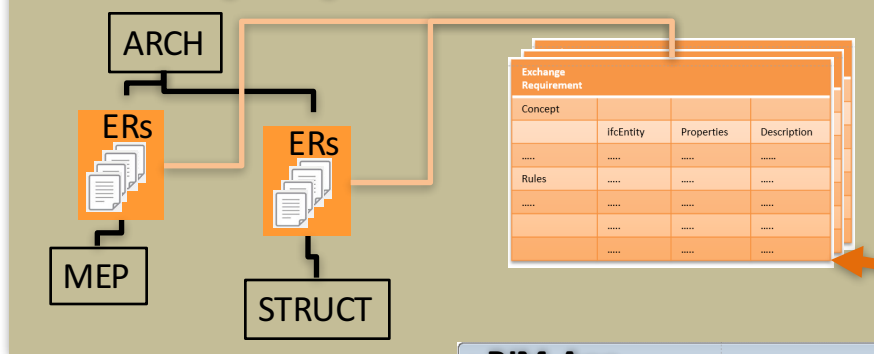

MVD in Detail

- Root concepts (building components, e.g. Wall, Space, Railing)
 - Series of Concepts (units of functionality)
 - e.g. GUID, History, Placement, Geometry Box, Geometry Axis, ...
 - e.g. Geometry Body (Swept Solid, Clipping, CSG, Explicit, Mapped, ...)
 - Concept rules
 - e.g. specific enumeration-ranges for properties
 - e.g. requirements for geometry for a specific purpose
- Exchange Requirements
 - Fulfilling specific purposes
 - Scenario driven focussed requirements
 - Defining a subset of an MVD
- Test-specific MVDs
 - Specifying a subset of the MVD focussing for the purpose/content of a specific test
 - e.g. tests focussing on specific concepts

MVD / Ex.Requ. / BIM-Apps

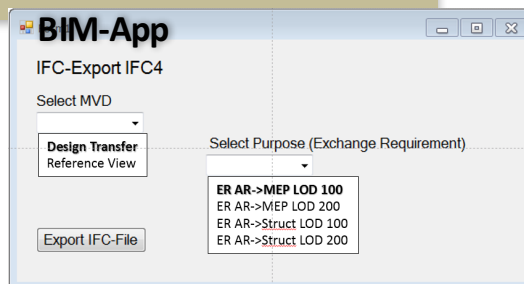

IFC4-MVD: e.g. Design Transfer

Exchange Requirements:

- Part of an MVD
- Scenario/Purpose driven
- Domain specific
- LoD-specific (Level of Detail)
- LOD-specific (Level of Development: 100, 200,...)
- Contractual Data Drops
- HOAI-Phases
- ... COINS, MMC, iModel, ...

An IFC-File correlates with an ER of a MVD

IFC-File

IFC4-MVDs

Reference View

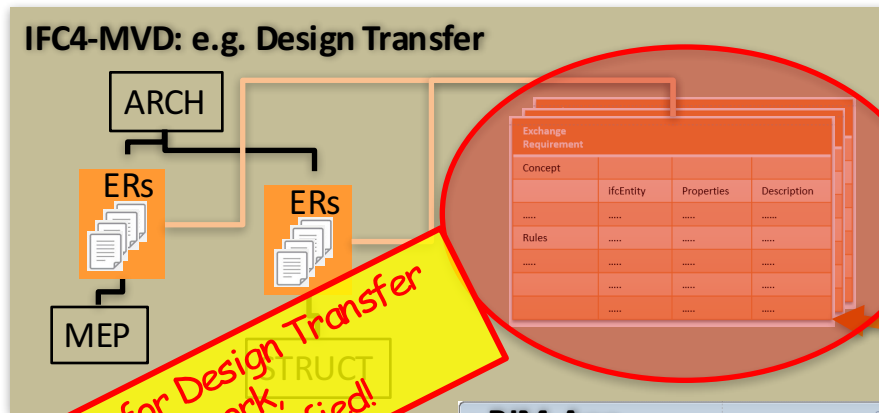

- Export from
 - ARCH
 - MEP
 - STRUCT
- Import into
 - Viewers, Collaboration Tools
 - MEP, STRUCT, ARCH
 - **For Viewing and Referencing only**
- Change Request
 - Via BCF 

Design Transfer View

- Export from
 - ARCH
 - MEP
 - STRUCT
- Import into
 - Arch
 - MEP
 - HVAC, Heating, Plumbing, Electrical
 - Struct
 - Concrete, Steel, Timber
 - **For Using transferred data**
- Change Request
 - Via BCF 
- **Undefined:**
 - **Specific ERs**

MVD / Ex.Requ. / BIM-Apps

IFC4-MVD: e.g. Design Transfer

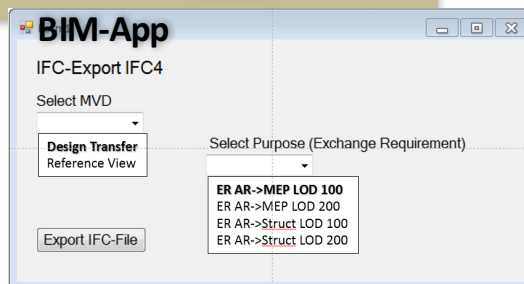

Exchange Requirements:

- Part of an MVD
- Scenario/Purpose driven
- Domain specific
- LOD-specific (Level of Detail)
- LOD-specific (Level of Development: 100, 200,...)
- Contractual Data Drops
- HOAI-Phases
- ... COINS, MMC, iModel, ...

IFC for Design Transfer will only work, if this is specified!
